Confirmation is the world's leading digital platform and global network for confirming financial data, helping you **speed up and simplify your audit confirmations**.

Why use Confirmation?

Confirmation offers several benefits over the alternate channels for submitting your audit confirmations, including:

1. Faster completion of audit confirmation requests
2. Elimination of lost, misdirected mail or postal delay
3. A secure and reliable online service that validates users and complies with auditing standards
4. A traceable activity trail of all individuals involved in the confirmation process
5. A simple online authorisation process for your clients

Validated and proven bank network

Confirmation is the top choice for auditors and banks globally. Our validated bank network includes more than 4,000 responding banks and departments. Nearly 600 of those banks now respond exclusively through Confirmation, including 9 of the top 10 leaders like **HSBC, Hang Seng, Citi, Standard Chartered, Bank of East Asia** among others are already responding quickly to busy season audit requests on our platform.

Supporting E in your ESG

Using Confirmation helps audit firms and banks eliminate use of thousands of paper leaflets every year, which are currently being used to send paper requests and responses through post, fax or email. Going paperless, we can all together go green, help save the earth and make the process ESG compliant.

Take advantage of lower cost

HSBC Hong Kong has reduced the bank processing fee for requests submitted via Confirmation, effective immediately. Given the courier costs between multiple stakeholders and time / admin costs incurred for paper requests, you can achieve significant cost savings by submitting online via Confirmation.
